

Ximian Evolution

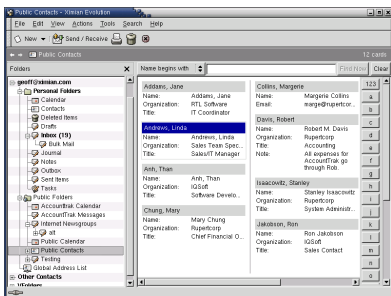

Integrated Personal Information Management for Linux

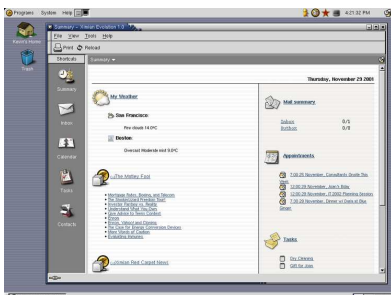

Send and receive messages and attachments with full-featured email management tools.

Extend invitations, track responses and manage your schedule with the flexible calendar

Manage addresses and exchange contact information using convenient vCards.

View the Ximian Evolution Summary page to see a simple one-screen view of your day.

Ximian Evolution™ is the premier personal and workgroup information management solution for Linux and UNIX-based systems. The software seamlessly integrates email, calendaring, meeting scheduling, contact management and task lists in one powerful, fast, and easy to use application.

Ximian Evolution also delivers a comprehensive set of features that help you manage even the most complex mailboxes. Automatic email indexing keeps your information at your fingertips, and the unique Ximian vFolders™ are virtual folders you use to create and save powerful contextual views of your email messages.

Ximian Evolution is also powerful collaboration software that connects Linux and UNIX users to popular corporate communication architectures.

Ximian Evolution supports standard communications and data interchange standards, so you can collaborate with users on other platforms. For example, Ximian Evolution is compatible with SMTP, Authenticated SMTP, POP, IMAP and other standard messaging environments. It can import mailboxes created with Netscape, Outlook Express, UNIX mbox, Eudora and other email managers. It supports peer-to-peer calendaring with users on products that support iCalendar including Microsoft Exchange and Lotus Notes. Ximian Evolution uses corporate address books created using the popular LDAP protocol. And, Ximian Evolution supports the vCard standard; so sharing personal information with other users is easy

Ximian Evolution

Integrated Personal Information Management for Linux.

Ximian Evolution is the premier personal and workgroup information management solution for Linux and UNIX-based systems. The software seamlessly integrates email, group calendaring, contact management and online task lists in one powerful, fast and easy-to-use application.

Powerful Email Handling

- * **Flexible Message Formatting**
View and send email in either HTML or text formats. Include embedded images or attachments.
- * **vFolders™**
Only in Ximian Evolution, vFolders save email searches to dynamically create powerful, contextual views of your online messages.
- * **Address Recognition**
Automatic pop-ups list possible addresses as you type to speed the process of communicating with individuals and groups.
- * **Built-in Spell Checker**
- * **Flexible E-Mail Views**
View email chronologically, by author or by thread. Create custom folders to organize your messages.
- * **Automatic Email Indexing**
Speeds email searching for high volume mailboxes.
- * **User-defined Filters**
Automatically move incoming and outbound mail into specific, customizable folders.
- * **Multiple Account Management**
Receive, manage and organize messages from multiple email accounts.

Powerful, Flexible Calendar

- * **Personal Date Management**
Effortlessly create one-time, all-day or recurring events - edit events or reschedule them with ease.
- * **Meeting Scheduler**
Create and confirm group meetings online, even with Microsoft Outlook and Lotus Notes users.

* Customized Reminders

Attach an automatically generated on-screen message, email reminder, sound alarm or launch a program to alert you to an upcoming event.

* Multiple Calendar Views

View or print calendars in daily, weekly and/or monthly formats.

Integrated Information Management

* One-screen Summary

Convenient Summary view provides a one-screen snapshot of upcoming appointments, tasks, new mail, and more.

* Palm Device Support

Two-way synchronization between your Evolution calendar address book and to-do list and your Palm handheld device keeps you current.

* One-click Shortcuts

Create icons to launch your most frequently used views and folders.

* Flexible Address Book Formats

Switch between card and table views for contact management.

* To-Do List

Management features include date, priority, deadlines or other criteria you choose.

* Quicksearch

Find appointments, contacts, email messages and to-do items fast.

* Security and Encryption

Supports industry-standard encryption standards to ensure message security: PGP/GPG, SASL and SSL/TLS.

Broad Distribution Support

- * Use on workstations running:

Red Hat, TurboLinux, Mandrake, YellowDog, SuSE, LinuxPPC, Debian, Solaris, Irix

Compatible With Existing Messaging Platforms

Because Ximian Evolution supports the major industry standards, it connects your Linux and UNIX users to your existing corporate communications infrastructure.

* Broad Interoperability

Work with a broad range of corporate messaging environments such as Microsoft Exchange and Lotus Domino using IMAP, POP, SMTP, and Authenticated SMTP protocols.

* Use Standard Mailboxes

Import and read mailboxes in common mailbox formats, such as Eudora, UNIX mbox, MH, Maildir, Netscape, and Outlook Express.

* iCalendar Support

Arrange appointments and schedule meetings with users of other personal information management tools, including Microsoft Outlook, Lotus Organizer and other applications that support the iCalendar protocol.

* LDAP Compatible

Leverage and share existing company address books through LDAP support.

* Share vCards

Send and share electronic business cards with other applications such as Microsoft Outlook, Lotus Notes and other applications that support the vCard standard.
